

Design & Technology - Whole School Progression Map

Discovery MAT – Design & Technology Curriculum Statement

Quote that guide us:

'Good buildings come from good people, and all problems are solved by good design.' Stephen Gardiner (British Architect)

'High-quality design and technology education makes an essential contribution to the creativity, culture, wealth, and well-being of the nation.' National Curriculum.

Why is it important to teach Design & Technology? (Intent)

Design and Technology is an inspiring, rigorous and practical subject. D&T should provide children with a real-life and relevant context for learning. As a STEM trust, we encourage children to use their inquiry, observation, creativity, problem-solving, flexibility, and collaboration skills to design and make products that solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants, and values. Through the D&T curriculum, children should be inspired by engineers, designers, chefs, and architects to enable them to create a range of structures, mechanisms, textiles, electrical systems, and food products with a real-life purpose.

Key Concepts:

- Using creativity and imagination, pupils design and make products that solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants and values.
- They acquire a broad range of subject knowledge and draw on disciplines such as mathematics, science, engineering, computing, and art.
- Pupils learn how to take risks, becoming resourceful, innovative, enterprising, and capable citizens.
- Through the evaluation of past and present design and technology, they develop a critical understanding of its impact on daily life and the wider world.

Curriculum Design (Implementation)

Our D&T curriculum provides a clear and comprehensive document that will show progression of skills and vocabulary across all key stages within the strands of D&T. All teaching of D&T follows the design, make, and evaluate cycle. Each stage is rooted in technical knowledge. The design process is rooted in real-life, relevant context and linked with our topic to ensure meaning and purpose to the learning. While making, children are provided with choice of a range of tools to choose freely from. To evaluate, children evaluate their finished products against a design criterion. Each of these stages are given equal weight.

In KS1 this looks like:

Design

- design purposeful, functional, appealing products for themselves and other users based on design criteria
- generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology

Make

- select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing).
- select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics

Evaluate

- explore and evaluate a range of existing products
- evaluate their ideas and products against design criteria

In KS2 this looks like:

Design

- use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups

Design & Technology - Whole School Progression Map

- generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

Make

- select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately
- select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

Evaluate

- investigate and analyse a range of existing products
- evaluate their ideas and products against their own design criteria and consider the views of others to improve their work
- understand how key events and individuals in design and technology have helped shape the world

Knowledge Focused

To ensure clear sequences of learning, key skills and key knowledge for D&T have been mapped across the Discovery MAT wide progression document, which is used to plan sequences of lessons. These give small steps that build towards key end points that link to the National Curriculum. These break down the National Curriculum statements into smaller steps. Key vocabulary is identified for each year group.

What we do well as a Trust (Impact)

As a MAT, we aim to create an inquisitive learning environment within our classrooms and reinforce the understanding that they are a supportive place to plan, implement and adapt ideas and learn. The study of D&T across the MAT allows our pupils to safely experience the wide range of skills and knowledge encompassed by this practical subject. All the D&T sequences have been planned and designed carefully to ensure they correlate with themes of learning and often have many cross-curricular links, particularly with History, Geography and Science. As well as each sequence of lessons being purposeful, we ensure they are relevant and modern in many ways. Our key STEM skills run through every aspect of D&T: inquiry, observation, creativity, problem-solving and collaboration. Therefore, we encourage children to become independent, reflective, creative critical thinkers, both as individuals and part of a team.

Design & Technology - Whole School Progression Map

Design & Technology Curriculum & EYFS Framework		
EYFS	KSI	KS2
<p>Nursery:</p> <ul style="list-style-type: none"> • Use one-handed tools and equipment, for example, making snips in paper with scissors. (PD) • Select shapes appropriately: flat surfaces for building, a triangular prism for a roof etc. (M) • Combine shapes to make new ones – an arch, a bigger triangle etc. (M) • Use all their senses in hands-on exploration of natural materials. (UW) • Make imaginative and complex ‘small worlds’ with blocks and construction kits, such as a city with different buildings and a park. (EAD) • Explore different materials freely, to develop their ideas about how to use them and what to make. (EAD) • Develop their own ideas and then decide which materials to use to express them. (EAD) • Join different materials and explore different textures. (EAD) • Make healthy choices about food, drink, activity and toothbrushing. (PSED) <p>Foundation:</p> <ul style="list-style-type: none"> • Return to and build on their previous learning, refining ideas and developing their ability to represent them. (EAD) • Create collaboratively, sharing ideas, resources and skills. (EAD) 	<p>Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home and school, gardens and playgrounds, the local community, industry and the wider environment].</p> <p>When designing and making, pupils should be taught to:</p> <p>Design</p> <ul style="list-style-type: none"> • design purposeful, functional, appealing products for themselves and other users based on design criteria • generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology <p>Make</p> <ul style="list-style-type: none"> • select from and use a range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing] • select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics <p>Evaluate</p> <ul style="list-style-type: none"> • explore and evaluate a range of existing products • evaluate their ideas and products against design criteria 	<p>Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home, school, leisure, culture, enterprise, industry and the wider environment].</p> <p>When designing and making, pupils should be taught to:</p> <p>Design</p> <ul style="list-style-type: none"> • use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups • generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design <p>Make</p> <ul style="list-style-type: none"> • select from and use a wider range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing], accurately • select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities <p>Evaluate</p> <ul style="list-style-type: none"> • investigate and analyse a range of existing product • evaluate their ideas and products against their own design criteria and consider the views of others to improve their work

Design & Technology - Whole School Progression Map

<ul style="list-style-type: none"> • Compose and decompose shapes so that children recognise a shape can have other shapes within it. (M) • Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function. (EAD) ELG • Share their creations, explaining the process they have used. (EAD) ELG 	<p>Technical knowledge</p> <ul style="list-style-type: none"> • build structures, exploring how they can be made stronger, stiffer and more stable • explore and use mechanisms [for example, levers, sliders, wheels and axles], in their products <p>Cooking and nutrition As part of their work with food, pupils should be taught how to cook and apply the principles of nutrition and healthy eating. Instilling a love of cooking in pupils will also open a door to one of the great expressions of human creativity. Learning how to cook is a crucial life skill that enables pupils to feed themselves and others affordably and well, now and in later life.</p> <p>Pupils should be taught to: Key stage 1</p> <ul style="list-style-type: none"> • use the basic principles of a healthy and varied diet to prepare dishes <p>understand where food comes from</p>	<ul style="list-style-type: none"> • understand how key events and individuals in design and technology have helped shape the world <p>Technical knowledge</p> <ul style="list-style-type: none"> • apply their understanding of how to strengthen, stiffen and reinforce more complex structures • understand and use mechanical systems in their products [for example, gears, pulleys, cams, levers and linkages] • understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors] • apply their understanding of computing to program, monitor and control their products <p>Cooking and nutrition As part of their work with food, pupils should be taught how to cook and apply the principles of nutrition and healthy eating. Instilling a love of cooking in pupils will also open a door to one of the great expressions of human creativity. Learning how to cook is a crucial life skill that enables pupils to feed themselves and others affordably and well, now and in later life.</p> <p>Pupils should be taught to Key stage 2</p> <ul style="list-style-type: none"> • understand and apply the principles of a healthy and varied diet • prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques <p>understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed</p>

Design & Technology - Whole School Progression Map

Design & Technology Curriculum Overview

EYFS	All About Me Build model of own home or local landmark of Plymouth	Woodland Explorers Create a bug house/habitat	To Infinity and Beyond Build junk model rockets	Things that Grow Healthy food – fruit kebabs!	Trains, Planes and Cars Junk models – making vehicles	On the Seven Seas Boats
Y1	Amazing Me Healthy Eating – design a healthy dish	Weather Watchers Design and make a rain gauge	What's in the Toy Box? Design, make and evaluate a toy vehicle	Our Local Area	Women in History	Kenya: Too Hot to Handle!
Y2	Our Great Britain	British Bridges To design, make, test and evaluate a bridge	Greenland: Below Zero	UK Climate	World Explorers World Landmarks/ architecture Using 3-D Builder	Commotion in the Ocean Textiles – sea scene weaving
Y3	Prehistoric Britain	Master of Disaster Design a structure to withstand a natural disaster!	Dinosaurs and Fossils	Food and Farming Prepare a meal based on seasonality	Egyptians Design and make an Egyptian Pharaoh's Collar	Plymouth Hoe: Our City!
Y4	Shang Dynasty Food from another culture – prepare a savoury dish	Journey Through North America	Ancient Greece	Australia	Ancient Rome Create Roman Chariots – using mechanisms	Inventions Which Changed the World Create a model lighthouse, incorporating a circuit
Y5	Romans in Britain/ Anglo Saxons Design a Roman/Anglo-Saxon tunic (pillow case)	Space: Out of this World Program and control a Robot space buggy (Mars Rovers)!	Vikings	Our Changing World	Ancient Maya	Amazon Rainforest Make a percussion instrument e.g. rain stick, xylophone, string instrument
Y6	Dartmoor Draw and design a 3D map of an area on Dartmoor Programme drones to hover above 3D maps.	Tudors: Port of Plymouth Design a Tudor purse	British Empire & Industrial	Biomes of the world	20th Century Conflict Food – rationing (food groups) / seasonality	

Design & Technology - Whole School Progression Map

Design		A plan or drawing produced to show the look and function or workings of a building, garment, or other object before it is made. Computer Aided Design (CAD) can be used to refine designs (KS2).
Make		The process of applying skills to make or produce something. This involves the use of a variety of tools and materials.
Evaluate		Judging the quality, value or relevance of a product through identifying improvements that could be made.
Cooking & Nutrition		Preparing food for a particular purpose and audience. Researching and considering the nutritional value of each food group.
Technical knowledge: Textiles		The process of weaving, knitting, sewing and joining a variety of materials such as cotton, felt, leather etc to produce a quality product with a particular purpose.
Technical Knowledge: Mechanisms		Combining a system of parts working together in a machine to create a quality product with a particular purpose.
Technical Knowledge: Structures		The process of using wood, metal, card and other materials to constructor build a product from different interrelated parts with a fixed location on the ground.
Technical Knowledge: Electrical Systems / ICT		Using a network of electrical components (used to supply, transfer, and use electric power) to produce a quality product with a particular purpose. CAD / Programming.

Design	Make	Evaluate	Technical Knowledge				
			Cooking 	Textiles 	Mechanisms 	Structures 	Circuits / ICT

Design & Technology - Whole School Progression Map

SEQUENCE OF LESSONS FOR EVERY DESIGN & TECHNOLOGY UNIT.

Year	Design 	Make 	Evaluate 
1	<p>Understand context, users and purposes:</p> <ul style="list-style-type: none"> Use senses to support enquiry of products within contexts, such as imaginary, story based, home, school, gardens, playgrounds, local community, industry and the wider environment. State what the product is and talk about the parts and how they work. Use simple design criteria to help develop their ideas. <p>Generating, developing, modelling and communicating ideas:</p> <ul style="list-style-type: none"> Generate ideas by drawing on their own experiences. Use knowledge of existing products to generate ideas, Develop and communicate ideas by talking, drawing and using pictures. Decide on resources from a given selection. 	<p>Planning:</p> <ul style="list-style-type: none"> Discuss and record the stages of making. Select from a range of tools and equipment and begin to explain the choices. <p>Practical Skills & Techniques:</p> <ul style="list-style-type: none"> Follow procedures for safety and hygiene. Use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components selected by the teacher. Cut and shape materials and components. Roll paper and card to form a tube. Cut using scissors. Join using glue and tape. Use finishing techniques, including those from art and design 	<p>Own Products:</p> <ul style="list-style-type: none"> Discuss their design ideas and what they are making. Make simple judgements about how well their product works against small amount of design criterion. Start to discuss changes made during the making process. <p>Existing Products:</p> <ul style="list-style-type: none"> Generate a design criterion through adult led discussion. Through adult led discussion, identify the basic purpose and features of existing products (purpose, material, user, function). Express likes and dislike about existing products. Identify some design features.
2	<p>Understand context, users and purposes:</p> <ul style="list-style-type: none"> Use knowledge of existing products to support planning of similar products. State what the product is and say who is for and why. Describe how it works based on disassembling and investigating products. 	<p>Planning:</p> <ul style="list-style-type: none"> Discuss and record an increased number of stages of making. Select from a range of tools and equipment and begin to explain the choices. Select appropriate materials. 	<p>Own Products:</p> <ul style="list-style-type: none"> Discuss their design ideas and what they are making. Make simple judgements about how well their product works against an increasing number of design criteria. Start to discuss changes made during the making process.

Design & Technology - Whole School Progression Map

	<ul style="list-style-type: none"> Describe the products purpose and how it is suitable for the intended users. Use simple design criteria to help develop their ideas. <p>Generating, developing, modelling and communicating ideas:</p> <ul style="list-style-type: none"> Generate ideas by drawing on their own experiences. Use knowledge of existing products to generate ideas. Develop and communicate ideas by talking and drawing. Model ideas by exploring materials, components and construction kits and by making templates and mock-ups. Consider realistic resources when making design decisions. 	<p>Practical Skills & Techniques:</p> <ul style="list-style-type: none"> Follow procedures for safety and hygiene. Use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components to improve the look of my product. Measure and mark materials and components using a pencil and ruler. Cut and shape materials and components. Assemble, join and combine materials and components using different materials. Use finishing techniques, including those from art and design 	<ul style="list-style-type: none"> Suggest how their products could be improved. <p>Existing Products:</p> <ul style="list-style-type: none"> Generate a design criterion through class led discussion. Through adult / class led discussion, identify the basic purpose and features of existing products (purpose, material, user, function). Express likes and dislike about existing products and say why. Identify some design features.
3	<p>Understand contexts, users and purposes:</p> <ul style="list-style-type: none"> Work confidently within a range of contexts, such as imaginary, story-based, home, school, gardens, playgrounds, local community, industry and the wider environment. Gather information about the needs and wants of particular individuals and groups. Identify the needs, wants, preferences and values of particular individuals and groups and use this to develop a design criterion. 	<p>Planning:</p> <ul style="list-style-type: none"> Discuss and reason about the order of the main stages of making. List and select tool and equipment choices with reasoning. Select appropriately from a range of materials. <p>Practical Skills & Techniques:</p> <ul style="list-style-type: none"> Plan and follow procedures for safety and hygiene. Suggest and use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components. 	<p>Own Products:</p> <ul style="list-style-type: none"> Refer back to their design ideas and when making. Use their design criteria to evaluate their completed product e.g. how well it met a particular purpose. Evaluate and alter the product during the making process. Suggest some improvements and give detail about what was good and not so good about their original design. <p>Existing Products:</p> <ul style="list-style-type: none"> Use existing products to independently generate a design criterion.

Design & Technology - Whole School Progression Map

	<ul style="list-style-type: none"> Use evidence to Identify their own design criteria and use this to inform their ideas. <p>Generating, developing, modelling and communicating ideas:</p> <ul style="list-style-type: none"> Generate realistic ideas, focusing on the needs of the user. Include features of existing products when generating ideas. Begin to use annotated sketches and cross-sectional drawings to develop and communicate their ideas. Model ideas by exploring materials, components and construction kits and by making templates and mock-ups. Consider realistic resources when making design decisions. 	<ul style="list-style-type: none"> Measure and mark lengths to the nearest cm using a pencil & ruler or CAD. Use a range of tools to cut and shape materials and components with some accuracy. Independently assemble, join and combine materials and components with some accuracy. Apply a range of finishing techniques, including those from art and design, with some accuracy, amend to improve the product. 	<ul style="list-style-type: none"> Identify and rate the purpose and features of existing products (purpose, material, user, function). Identify pros and con about a product and use to inform design choices. Analyse and rate design features (durability, functionality etc). Begin to discuss designers/engineers.
4	<p>Understand contexts, users and purposes:</p> <ul style="list-style-type: none"> Work confidently within a range of contexts, such as imaginary, story-based, home, school, gardens, playgrounds, local community, industry and the wider environment. Gather information about the needs and wants of particular individuals and groups. Identify the needs, wants, preferences and values of particular individuals and groups and use this to develop a design criterion. Use evidence to Identify their own design criteria and use this to inform their ideas. <p>Generating, developing, modelling and communicating ideas:</p>	<p>Planning:</p> <ul style="list-style-type: none"> Discuss and reason about the order of the main stages of making. List and select tool and equipment choices with reasoning. Select appropriately from a range of materials. <p>Practical Skills & Techniques:</p> <ul style="list-style-type: none"> Plan and follow procedures for safety and hygiene. Sort food into groups, e.g. fruit, vegetable, meat etc. Use basic tools to cut, shape and mix, e.g. cutters and whisks. Know where a few of the foods I am cooking comes from. 			<ul style="list-style-type: none"> Work safely and hygienically. Sort and classify food into food groups, e.g. vegetables, pulses, cereals, dairy etc. Measure and weigh accurately using cups and spoons. Talk about what happens when I cook and bake. Know what makes a healthy diet. Talk about where some of the food they are cooking comes from. 			<ul style="list-style-type: none"> Talk about what needs to be done in order to work safely and hygienically. Use simple tools e.g. hand whisk, rolling pins. Sort and classify food according to specific food groups, e.g. proteins, carbohydrates, fats etc. Measure and weigh using standard units and scales. Talk about the way in which food processing can affect the taste, appearance, texture and colour of food. 			<p><i>Understand and apply the principles of a healthy and varied diet.</i></p> <p><i>Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques.</i></p> <p><i>Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.</i></p> <ul style="list-style-type: none"> Talk about why we need to work safely and hygienically. Talk about the characteristics of a range of food and ingredients and where the foods come from. Use knowledge of food and cooking to start generating their own recipes. Talk in simple terms about the physical and chemical (observational skills). Know how some of the ingredients are grown, reared, caught and processed. 		<ul style="list-style-type: none"> Apply the rules for basic food hygiene and other safe practices e.g. hazards relating to the use of ovens. Talk in detail about the characteristics of a range of food and ingredients and where the food comes from. Talk about the impact of changing proportions within a recipe. Talk in scientific terms about the physical and chemical changes that take place when food is cooked. Know how a variety of the ingredients are grown, reared, 		<ul style="list-style-type: none"> Know and understand the practice needed in terms of food hygiene and kitchen safety. Talk about how the properties of certain foods can affect the final product. Choose the appropriate methods and equipment for measuring, e.g. time, dry goods, liquids etc. Compare and evaluate several ideas in order to draw up a design specification. Compare commercial and domestic processes for producing food, e.g. bread. To know how most of ingredients are grown, reared,

N.B: The shaded part is the skills each year group will be covering. You may need to look at some of the skills in a year group below yours if it is not covered the year before to make sure you are pitching your lesson correctly. The parts in bold are the National Curriculum words and must be taught. The rest is a guide which may help to establish where your children may be working. It is a 'best fit' model.
